Why Your Organization Needs Regular PenTests

Real-World Simulation

A PenTest simulates a cyberattack to assess your security environment. It prioritizes vulnerabilities by degree of risk, addressing critical issues first and exposing vulnerabilities for potential entry points.

01

Continuous & Affordable

To protect against evolving cyber threats and changes in your environment, periodic PenTests help you stay ahead of hackers - enabling the vulnerabilities to be remediated before exploited.

02

Compliance Made Simple

Comprehensive reports earn your trust and meet security best practices and regulatory requirements for SOC2, PCI DSS, HIPAA, ISO 27001, as well as today's evolving cyber insurance requirements.

03

100% Certified Experts

PCA is proud to partner with Kaseya to offer this proactive cybersecurity solution that's trusted globally to manage and secure more than 300 million devices. Gain assurance and peace of mind.
